

Grow Something With Your Data!

Major Workstreams

Research

Fundamental AI research (deep learning, reinforcement learning, NLP)

Collaborative projects with universities and defense agencies

Publication of white papers and conference presentations

Product Development

End-to-end AI product lifecycle (concept → prototype → production)

Custom AI solutions tailored to industry needs

Continuous integration and deployment pipelines for AI models

AI Services

*AI consulting and strategy workshops
Model training, fine-tuning, and deployment support*

Data strategy, preprocessing, and governance

Performance monitoring & model maintenance

NAICS

- **541715** Research and Development in The Physical, Engineering, and Life Sciences
- **513210** Software Publishers
- **518210** Computing Infrastructure Providers
- **541330** Engineering Services
- **541511** Custom Computer Programming Services
- **541512** Computer System Design Services

Core Capabilities:

Generative AI

Reinforcement Learning

Predictive Analytics

Natural Language Processing

Computer Vision

Sensor Processing

MLOPs

Command and Control

Model Hosting

WHO WE ARE:

We are a veteran owned Huntsville-based AI research company focused on growth and development of both AI technology and the skills industry that supports the tech.

- ❖ Conducting cutting edge research and development in AI.
- ❖ Providing advanced technology services to a broad spectrum of clients (DoD, private industry, academia).
- ❖ Cultivating tech talent in and around Huntsville, positioning the region as a national and global AI hub

Our focus in AI development is to bring about adoption of the technology in a healthy way that balances scientific advancement, human society, and environmental impacts, bringing about a smarter more intelligent future.
